Skills

Frontend

Development and maintenance of: product interfaces, client-side logic, API interactions, component libraries and design systems, npm packages, and product AI features. Performance optimization. Semantic, responsive, and cross-browser markup: BEM, Mobile-first, animation. Testing of components, APIs, and cross-browser checks.

JavaScript · TypeScript · HTML · CSS · SCSS · Tailwind CSS · Flexbox · Grid · Animations · Framer Motion · Rive · Lottie · Swiper · Radix UI · Headless UI · react-hook-form · MDX · React · React Hooks · Next.js · Redux · Zustand · jotai · i18n · REST · GraphQL · Fetch · Jest · Vitest · React Testing Library · Playwright · a11y · Lighthouse · Storybook · Vite · Webpack · ESLint · Node.js · npm · Less · PostCSS · Vue 2 · Vue 3 · Vuex · Pinia · Nuxt 2 · Nuxt 3 · Quasar · Gatsby · Jamstack · Rollup · Grunt · Gulp · Yarn · Axios

Infrastructure & Tools

Working with Jamstack. Setting up and integrating a Headless CMS into the project. Configuring infrastructure for local development and deploying the project on a VPS in Docker. Setting up internal and external routing, including SSL. Configuring CI/CD and building the project. Automating code quality control: git hooks, linting, and formatting. SEO analysis and project optimization. Working with AI tools: writing code, review, refactoring, debugging, and testing.

My career

June 2025 – Now, 1 year 4 months

sellmonitor.com

Sales analytics service for marketplace sellers

Senior Frontend Developer

Building new and growing existing analytics and automation tools that bring marketplace sellers to the service.

- Launched 6 new sections of the service.
 - Order geography — a region and warehouse map on ECharts.
 - Query monitoring — product positions for selected search queries.
 - Positions in shelves — product distribution across recommendation shelves.
 - Niche analysis — a niche table with filters and drill-down into products.
 - Suggestions — a public idea board on Next.js and Strapi: moderation, comments, and text pre-moderation via OpenAI.
 - Promo banners — targeting, display frequency, and content through Strapi.
- Developed 5 more existing sections: Repricer, Sales, Unit economics, Ad management, and Support tickets.
- Rebuilt the public sellmonitor.com website: home page, pricing, marketplace pages, partner program, and SEO pages.
- Developed the shared component library on TanStack Table and ECharts.

JavaScript · TypeScript · React · React Hooks · Next.js · SSR · jotai · Immer · React Hook Form · TanStack Table · ECharts · Headless UI · Radix UI · HTML · CSS · Tailwind CSS · Flexbox · Grid · Animations · Motion · Node.js · Strapi · Redis · OpenAI API · Vercel AI SDK · Amplitude · Vite · Chrome Extension · Fetch · Axios · ESLint · Prettier · Turbopack · VSCode · Terminal · Git · GitHub

Project work

Studio 15

Web development outsourcing studio

Frontend Team Lead

Organizing the frontend team's work and developing the studio's client projects.

- Led a frontend team of 5 developers: task prioritization, code review, releases, and stack decisions.
- Established a shared code style across the team's projects: ESLint, Prettier, lint-staged, and commitlint.
- Worked on 8 studio projects across different stacks.
 - CMS and corporate website for an agricultural holding — Next.js.
 - Marketplace of ghost-produced music tracks — Nuxt.
 - Coconut water brand website — Laravel and Vite.
 - Promo landing for a charity fund — Laravel and Blade.
 - Hot sauce brand landing — Next.js.
 - Mango snack brand landing — Next.js.
 - Widgets for an airport parking service.
- Key project — the CMS and corporate website for an agricultural holding.
 - Migrated the CMS from Next.js 14 Pages Router to Next.js 15 App Router and from Redux to Zustand.
 - Completed and launched the CMS — 18 sections: pages, menus, products and brands, production sites, press center, banners, partners, vacancies, a WYSIWYG editor with images. Designed the interface without mockups on a component library.
 - Built the website from scratch on Tailwind CSS and Motion — 16 pages from mockups: a component base, animated sections, a brand and product catalog, a press center, an interactive map, and feedback forms with attachments.
- Wrote unit tests for components and business logic with Jest.

JavaScript · React · React Hooks · Redux · Zustand · Next.js · SSR · TypeScript · Axios · Jest · HTML · CSS · SCSS · Tailwind CSS · Less · Flexbox · Grid · Animations · Framer Motion · Vue · Nuxt · Node.js · ESLint · Prettier · npm · Webpack · VSCode · Terminal · Git · Docker · Nginx

pixelpoint.io

Product web studio

Frontend Developer

Development and maintenance of the studio's client marketing websites on Gatsby and Next.js with a Headless CMS.

- Worked on 9 client websites on Gatsby and Next.js with Tailwind CSS and Framer Motion.
 - isovalent.com — Gatsby and WordPress.
 - revenuecat.com — Gatsby and WordPress.
 - fonoa.com — Next.js and Sanity.
 - observiq.com — Next.js App Router and Sanity.
 - kcdzurich.ch — Gatsby.
 - terminal49.com — Next.js and Sanity.
 - terzo.ai — Next.js.
 - ebpfi.io and cilium.io — Gatsby.
- Built pixel-perfect pages from mockups with content from a Headless CMS: Sanity (including document schemas) and WordPress via GraphQL.
- Built interactive sections: animations with Framer Motion, Rive and Lottie, sliders, forms on react-hook-form integrated with HubSpot.
- Developed the projects' component base, used SSR and server-side data fetching in the Next.js App Router, and optimized loading of new and existing pages.
- Reviewed other developers' tasks, kept an eye on accessibility and SEO.

JavaScript · React · React Hooks · Next.js · SSR · Gatsby · TypeScript · GraphQL · Fetch · HTML · CSS · Tailwind CSS · Flexbox · Grid · Animations · Framer Motion · VSCode · Terminal · Git · GitHub · Jamstack · Headless CMS · Strapi · Sanity · WordPress · CI/CD · Gatsby Cloud · GitHub Actions · Netlify · Vercel · Semrush · Screaming Frog

ipgate.io

Proxy rental service

Frontend Developer

Project launch, feedback-driven improvements and migration from Quasar to Nuxt.

- Brought the project to launch: authentication, ordering, pricing, informational pages and multilingual support.
- After launch, fixed critical bugs and refined core modules based on user feedback without changing the design.
- Migrated the project from Quasar to Nuxt as part of the redesign, refactored the component base and covered key modules with unit tests.

JavaScript · Vue · Vuex · Quasar · Nuxt · SSR · TypeScript · Jest · HTML · CSS · Flexbox · Grid · Animations · Webpack · ESLint · Prettier · Fetch · Axios · VSCode · Terminal · Git · GitHub · GitHub Actions

December 2021 – September 2022, 9 months

sellmonitor.com

Sales analytics service for marketplace sellers

Frontend Developer

Building new analytics tools that bring marketplace sellers to the service.

- Launched 6 new sections of the service in 10 months.
 - Business — a seller's personal dashboard: marketplace API key connection and analytics on their own data.
 - Sales — a sales summary, per-product statistics, and lost profit.
 - Review autoreplier — reply rules, templates, stop words, and statistics.
 - Unit economics — calculations based on marketplace tariffs and saved calculations.
 - Categories — a list with search and filters, a category card with charts, brands, and merchants.
 - Exports — a report list with real-time status and file downloads.
- Built the project's base component library: buttons, inputs and forms, pagination, popovers, loading and empty states.

JavaScript · TypeScript · React · React Hooks · Next.js · SSR · jotai · Immer · React Table · ECharts · Headless UI · Radix UI · HTML · CSS · Tailwind CSS · Flexbox · Grid · Animations · Axios · Mercure · next-translate · ESLint · Prettier · Webpack · VSCode · Terminal · Git · GitHub

October 2018 – December 2021, 3 years 2 months

reg.ru

Russia's largest domain registrar and hosting provider

Frontend Developer

Developing an internal HR project, the domain area and the component library.

- As a senior developer, led the internal HR project to release: development, code reviews and unit tests for components and logic.
- Built the purchase flows for domains and add-on services in the domain area.
- Implemented design tokens and the component library in the company's projects.

JavaScript · Vue · SSR · Vuex · GraphQL · TypeScript · Jest · HTML · CSS · Less · Flexbox · Grid · Animations · Webpack · ESLint · Prettier · Fetch · VSCode · Terminal · Git · GitLab · Docker · Nginx

October 2016 – October 2018, 2 years

supl.biz

B2B wholesale marketplace

Frontend Developer

Development of a marketplace and internal projects for the company.

JavaScript · React · SSR · Redux · HTML · CSS · Less · PostCSS · Flexbox · Grid · Animations · Fetch · Axios · VSCode · Terminal · Git · Bitbucket · Docker · Nginx · Grunt · Gulp

May 2016 – October 2016, 5 months

franbazar.com

Franchise marketplace

HTML/CSS Developer

Layout development for new projects and mobile applications using WebView. Maintenance of existing projects.

JavaScript · HTML · CSS · Less · Flexbox · Animations · Fetch · VSCode · Terminal · Grunt · Gulp

February 2014 – May 2016, 2 years 3 months

pixlpark.ru

Web-to-print platform for printing houses

HTML/CSS Developer

Development of a demo website for a printing shop. Assistance to new and regular clients.

JavaScript · HTML · CSS · Flexbox · Animations · Terminal

Projects

Alongside my main job, I build my own open source libraries: React components, styles and theme generators from design tokens.

pbcomponents

React component library for rapid interface prototyping

[GitHub](#) [npm](#) [Figma Community](#) [Behance](#)

pbstyles

Style and design token library for rapid interface prototyping

[GitHub](#) [npm](#) [Figma Community](#) [Behance](#)

Tailwind Dictionary

Generating a Tailwind CSS theme from design tokens

[GitHub](#) [npm](#)

Mixin Dictionary

Generating Less and SCSS mixins from design tokens

[GitHub](#) [npm](#)
